Inpatient Services

**Inpatient Provider Cutoff Date for Proprietary and Non-HIPAA Standard Electronic Claim Formats:
December 1, 2005**

In accordance with efforts to comply with the federally mandated Health Insurance Portability and Accountability Act (HIPAA), Medi-Cal is planning to <u>discontinue</u> acceptance of proprietary and non-HIPAA standard electronic formats for electronic claim transactions. The first provider community to be affected is the Inpatient provider community.

Beginning **December 1, 2005,** proprietary and non-HIPAA standard electronic claim formats submitted by Inpatient providers will no longer be accepted.

Medi-Cal offers Computer Media Claims (CMC) filing using the ASC X12N 837 v.4010A1 transaction format. Acceptable media submission types are dial-up, tape or Internet. CMC and paper claims must meet the same billing requirements, according to Medi-Cal policy.

Information for 837 Transaction Applicants
The "HIPAA Update" and "HIPAA News" pages on the Medi-Cal Web site include links to a number of Web pages with important information for 837 transaction submitters and applicants, including technical specifications, implementation instructions, user guides, frequently asked questions (FAQs) and biller updates.

Application/Agreement Form
Providers may submit 837 transactions directly or employ a billing service to prepare and submit their 837 transactions. To become an authorized 837 transactions submitter, providers and billing services must first complete, sign and mail an application/agreement to the CMC Unit. The application is available on the Medi-Cal Web site at **www.medi-cal.ca.gov**. From the home page, click "HIPAA," then "Electronic Transactions: Biller Updates," "Computer Media Claims Enrollment and Testing Procedures for 837 4010A1 Transactions," then "*Medi-Cal Telecommunications Provider and Biller Application/Agreement*." The form is also found after the *CMC Enrollment Procedures* section in the Part 1 manual.

Self-Service HIPAA Transaction Utility Tool
A self-service environment, HIPAA Transaction Utility Tool, is currently being developed for Inpatient submitters. Initially, the utility tool will be available only for Inpatient submitters to validate ASC X12N 837 v.4010A1 transactions in preparation for proprietary format discontinuance. However, the utility tool will become available to other submitter communities as their timeline for proprietary format discontinuance is determined. Transaction validation is strongly recommended, but not required at this time.

Inpatient Provider Cutoff Date *(continued)*

The utility tool includes transaction validation (inclusive of Companion Guide-level editing), troubleshooting and reporting features that enhance, but do not replace, Medi-Cal's current testing and media activation requirements. Inpatient submitters have been notified of utility availability via e-mail or letter depending on information availability.

Providers may call the Telephone Service Center (TSC) at 1-800-541-5555 for more information.

Cutoff dates for non-HIPAA standard claim formats for all other provider communities will be announced in upcoming *Medi-Cal Updates*.

CMC Claim Submission for Medicare/Medi-Cal Crossover Billers

Medi-Cal can now receive electronic crossover claims directly from approved submitters via the ASC X12N 837 v.4010A1 transaction. Submitters using the 837 format must include Medicare payment information at the detail/claim line level. Additionally, Medi-Cal can receive electronic crossover claims automatically from Mutual of Omaha and United Government Services Medicare Intermediaries for most Part B services billed to Part A intermediaries. This new provision primarily affects outpatient and dialysis providers who were previously required to bill these claims on paper. Providers of Part B services billed to Part A intermediaries other than Mutual of Omaha and United Government Services must continue to bill their claims directly to Medi-Cal either on paper or in the new HIPAA standard 837 electronic transaction until a new automatic crossover process is established with the Medicare Consolidated Coordination of Benefits Contractor sometime in 2006.

In order to comply with HIPAA electronic standards, providers billing crossover claims on paper for Part B services billed to Part A intermediaries will be required to attach the detail/claim line level *National Standard Intermediary Remittance Advice* (Medicare RA) to a *UB-92 Claim Form* and comply with revised billing instructions. Any claims received after October 24, 2005 that do not comply with the new billing and attachment requirements will be returned to providers for correction before processing.

Providers may obtain detailed Medicare RAs by printing the "Single Claim" report, which can be accessed through the latest version of PC Print software, available free of charge. PC Print software and instructions are available on the United Government Services Web site (**www.ugsmedicare.com**) by clicking "Providers," then "EDI" and then the"PC Print Software" link. Providers should obtain the PC Print software from Medicare as soon as possible to ensure they can print the appropriate Medicare RAs.

2006 ICD-9-CM Diagnosis Code Updates

The following diagnosis code additions, inactivations and revisions are effective for claims with dates of service on or after January 1, 2006. Providers may refer to the *2006 International Classification of Diseases, 9th Revision, Clinical Modifications, 6th Edition* for ICD-9 code descriptions.
